ABOUT ME

Frontend Developer | React • JavaScript • Redux Toolkit • Tailwind CSS • Vite

I'm a Software Engineering graduate and Frontend Developer passionate about building clean, responsive, and user-friendly web applications.

WORK EXPERIENCE

FLO GEN DIGITAL INTERNSHIP PROGRAMME – FLO GROUP – 03/08/2026 – Current

FRONTEND AI ENGINEERING INTERN – FLYRANK AI – 10/06/2026 – Current

This is an online internship where I learn frontend engineering through AI.

FRONTEND DEVELOPER INTERN – CEN MEDYA YAZILIM – 15/10/2024 – 15/04/2025 – İSTANBUL, TÜRKİYE

This internship was my first step into frontend engineering. Here I have studied HTML, CSS, and frontend web development basics.

EDUCATION AND TRAINING

01/10/2021 – 15/10/2026 İstanbul, Türkiye

SOFTWARE ENGINEERING İstanbul Aydın University

Level in EQF EQF level 6

01/05/2026 – 15/07/2026 İstanbul, Türkiye

FRONTEND DEVELOPER SoftITo Yazılım-Bilişim Akademisi

As part of a comprehensive **320-hour Frontend Development Program**, I received hands-on training in modern JavaScript, TypeScript, the React ecosystem, Redux Toolkit, Context API, REST API integration, testing methodologies, and deployment. Throughout the program, I reinforced my theoretical knowledge by developing multiple real-world projects, gaining practical experience with modern frontend development workflows and best practices.

PROJECTS

EVALIS

EVALIS — Solo-built, frontend-only EV brand platform combining a cinematic marketing site, a customer ownership dashboard, and an admin back-office in one React 19 + TypeScript application. Designed and implemented the full data model, routing architecture, and a localStorage-based persistence layer (with cross-component sync via custom events) to simulate a real backend. Built live-map charging station tracking, an automated charge-scheduling engine, shop/checkout simulation, and full English/Turkish localization — all styled from scratch with Tailwind CSS v4, no UI library.

ConneXion AI – AI Customer Service Platform

Collaborated on the development of a multi-tenant AI customer support platform. Led the design and frontend implementation of role-based dashboards for Platform Admin, Workspace Admin, Manager, and Support Agent, delivering responsive, reusable, and scalable enterprise SaaS interfaces with React and Tailwind CSS.

Link <https://connexion-ai.vercel.app>

ParkinScan – AI-Powered Parkinson's Disease Screening Platform

Team graduation project that leverages machine learning for Parkinson's disease screening through facial emotion analysis. Led the design and end-to-end implementation of the web platform, building the complete user interface, integrating the ML model into the application, and deploying the system using Netlify, Render, and Supabase. Collaborated with teammates who handled data preprocessing and model development.

VOLUNTEERING

15/10/2025 – 15/04/2026 İstanbul Aydın University
Huawei Student Developers Team Member

I was responsible for managing the HSD İAU LinkedIn page by creating content, writing tech-based articles for HSD İAU Medium page, and finding volunteering speakers for our events.

CERTIFICATIONS

Up School, YGA, Citi, 16/07/2026
Future Talent Program

In 6 months, successfully completed the Future Talent Program – Product Development with AI by finishing Modules 101, 201, and 301. Built AI-powered web and mobile applications through hands-on projects, weekly live sessions, and practical assessments.

Mode of learning: Project based
