About Me

Final-year Software Engineering student at İstanbul Aydın University with hands-on frontend development experience gained through a 7-month internship and an intensive training programme. Passionate about building clean, user-focused web interfaces and continuously growing as a developer. Currently seeking frontend web development internship roles.

Work Experience

Frontend Web Development Intern

Oct 2024 – Apr 2025

Cen Medya Yazılım · Istanbul, Türkiye

- Built and maintained web interfaces using HTML, CSS, and JavaScript within a professional agency environment.
- Gained hands-on experience with real-world development workflows, version control (Git), and meeting production deadlines.

Education

B.Sc. Software Engineering (EQF Level 6)

2021 – 2026 (Expected)

İstanbul Aydın University · Istanbul, Türkiye

Frontend Developer Program

May 2026 – Present

SoftIto Yazılım Bilişim Akademisi · Online

- Intensive full-time training programme (6 days/week) focused on professional frontend development and software fundamentals.
- Relevant coursework: HTML5, CSS, JavaScript, Web Development Fundamentals, DevOps, Data Structures & Algorithms, Software Architecture, Database Management, Source Code Management (Git), Software Project Management.

Future Talent Program – Module 301 (Appreneurship)

2026 – Present

Up School · Online

- Ongoing programme focused on AI-driven product development: building web and mobile applications efficiently using modern AI tools and entrepreneurship methodologies.

Projects

ParkinScan — AI-Powered Parkinson's Detection Web App

parkinscan.netlify.app [GitHub](#)

Graduation Project · İstanbul Aydın University · 2025 – 2026

- Designed and built the complete single-page frontend (HTML, CSS, JavaScript) for a web app that screens for early signs of Parkinson's disease through real-time facial expression analysis.
- Implemented real-time facial tracking UI using MediaPipe FaceMesh, tracking 468 landmarks across 6 guided expressions with countdown timers, get-ready overlays, and live face-detection alerts.
- Integrated client-side PDF report generation (jsPDF), allowing users to download a personalised diagnosis report with probability scores and severity level.
- Connected the frontend to a FastAPI (Python) REST API, handling data serialisation and asynchronous communication between the browser and the CNN+LSTM AI model.
- Deployed the frontend on Netlify with automatic CI/CD from GitHub; deployed and configured the Python backend on Render.

Volunteering

Team Member

Sep 2025 – Apr 2026

HUAWEI Student Developers (HSD) – IAU Chapter

- Managed the HSD IAU LinkedIn and Medium pages, handling content creation, updates, and audience engagement.
- Authored 5+ technology-focused articles published on the chapter’s Medium page.
- Helped identify and invite guest speakers; assisted in planning and running chapter events.

Certifications

Future Talent Program – Module 201 May 2026

Up School · Online

Future Talent Program – Module 101 Apr 2026

Up School · Online

Huawei Cloud AI Bootcamp Aug 2025

Huawei · Online

- Completed a 4-week bootcamp with hands-on experience in ModelArts, image recognition, LLM fine-tuning, REST API deployment, and serverless AI workflows.

Skills

Frontend	HTML5, CSS3, JavaScript (ES6+), React JS (basic), Bootstrap
Backend	Python (basic)
Databases	MySQL, PostgreSQL (basic)
DevOps	Git, GitHub, Netlify, Render
Other	Canva, Notion, Technical Writing (Medium)

Languages

Turkish Native

English C1 – Advanced (Listening & Reading: C2 | Speaking & Writing: C1)
